

SRS Series 19" Sliding Rail System

Provides Rear Access to Shallow Components

EIA Compliant

Middle Atlantic's SRS Sliding Rail System pulls out a full 19" to provide rear access to components with shallow depths. Measuring 19" deep, the unit locks closed with included hardware and includes a rear pair of 7 space 10-32 rack rail. Sizes range from 8 to 20 spaces in 125 lb. (two slide) and 250 lb. (four slide) capacities, factory modified to the number of useable rackspace you require. For effective cable management, an optional triple-hinged, full-width cable carrier is offered. For detailed millwork dimensions, consult the A&E Spec below.

NEW! Brush Gasket fills unsightly gaps that may appear between the rack and custom millwork (requires a rough-in width of 19-5/8")

All of our rackrail is finished in durable 'e-coat' to guarantee no clogged threads.
