

CasaTunes Software v2.5

CasaTunes software is an application designed to enhance our whole house audio hardware solutions or your existing multi-room music system by integrating an advanced Music Server into your computer and enabling you to control your whole house audio system from anywhere in your home. CasaTunes makes it possible for you to listen to your favorite PC based music collection, your iPod, iTunes, internet radio, or various external music sources throughout the rooms in your home.

With CasaTunes each family member can select and control the music they want to listen to. You can control CasaTunes with a web-based browser, using Windows Media Center or even using your existing Russound or Nuvo keypads. Best of all, CasaTunes is designed to be easy to install, setup and maintain.

Features

- Browse and listen to internet radio stations
- Radio Station Manager
- Automatic iPod docking detection
- iTunes Support
- Supports most common browsers
- Support for CasaTunes XL Hardware
- NuvoNet Adapter Support
- Ability to group several rooms and control them as one
- View and control all rooms on one screen
- No need to copy or re-rip your music collection
- Sleep and wake-up to music
- Splits a 5.1 or 7.1 sound card to 3-4 stereo outputs
- Take it for a Test Drive at www.CasaTools.com
